

RAIN, RAIN, GO AWAY!

Roy Wainwright on flooding problems

We've had big problems with the square. It has flooded terribly at times and we've had to get some professionals in to have a look at it.

Not too long ago, the river came over and the ground was like a lake for two days. There was silt and sand – we just couldn't do anything. So we had to re-seed it and it's now doing very well.

But we know that if there's a lot of rain the river could come over again. It could happen any time and we couldn't do anything to stop it! We've got no barriers or anything like that. It cost £3,500 to sort things out last time – so it's not cheap.
